Edison didn't really invent the light bulb by himself. He used earlier inventions by other people, and he had a large team of people working with him, Edison did not really invent the light bulbs, but he did make it better. Edison saw a big problem with the earlier inventions for light bulbs. They did not last long enough and they were not easy to make large numbers. Edison worked with a team to solve the problem. They made the first light bulb that lasted long enough that could be sold for use in homes.
